

# STARGAZING

with Elizabeth Joyce

**MARCH / APRIL 2007**

*The Full Moon in VIRGO on March 3rd brings a Lunar Eclipse at thirteen degrees Virgo. Spring fever is in the air. Remember to keep your feet on the ground. Lasting romance is grounded in details that make up sharing a daily life. Love is in the air so enjoy the pleasures of a world awakening to a new spring.*

*The New Moon in ARIES on March 18th brings a Solar Eclipse at twenty-eight degrees Pisces. Honor your intuition as you navigate through an important crossroads in your life. Pick up some projects that have fallen by the wayside and dive into new plans for Spring.*

**MERCURY is retrograde until March 7th.**

**PISCES: Polarity: Feminine Sign: Mutable - Element: Water - Planetary Rule: 12th House / Neptune - Feet - FOCUS: Visionary Ideals**

## THE PERSONAL SIGNS

### ARIES (3/21 - 4/20)

Spring arrives, bringing with it renewed enthusiasm for personal plans and goals. Use the first half of March to plan what you want to achieve in the next twelve months. Although others' opinions can be helpful in this process, it is wise to listen with an open mind, as your own insights are likely to be your best guide. Tune into your body and soul as this month's eclipses emphasize your physical fitness. Get a checkup and initiate a change in diet and lifestyle that is the best for you. Even moderate exercise two or three times a week can have immediate results and long-term benefits. Laugh a lot! Money is on the upswing and very welcome. Be careful at month's end against taking any risks in legal matters, including with your driving skills.

### TAURUS (4/21-5/20)

Competition within your career is very stiff all

month, Taurus. You are determined to succeed, but give yourself a periodic reality check because tunnel vision can distort the true picture. Be very cautious with whom you trust. Someone who appears to be supportive may not be. The truth will be revealed on or around March 7th. You feel a sense of renewal at the Spring Equinox. Use the following weeks to re-energize yourself through daily meditation or time alone to reflect on this past year. That's the first step towards setting new goals for your new year, which begins in mid-April. Your social life picks up with new friends and perhaps meeting that special someone. Love, happiness, money and more can be yours in the weeks ahead if you focus and believe in yourself. Expect financial gains and a bonus at month's end.

### GEMINI (5/21-6/20)

Life, communication, and the information flow appear to be back on track once Mercury goes direct on March 7th. Unfortunately, it's only a lull with clarity until the third week in March. Be sure to cover your bases in-between. Line up supporters, confirm your facts, and double-check previous work. Be cautious with your tax returns. Take your car in for routine maintenance in the same time frame and try to postpone travel. Drive with care, Gemini. As Spring begins it's easy to lapse into a lazy mood and develop a taste for sweets and comfort food. Stop before you get started to prevent any body breakdowns! Stock your kitchen with healthy meals and snacks. Some moderate exercise, such as noontime walks, will get you moving and energized. As you grow in your career, you'll want to snap up every opportunity to impress those who count. Be careful not to step on anyone's toes in the

process, Gemini! Your social life and travel picks up at month's end.

### CANCER (6/21-7/22)

Your financial challenges begin to ease once Mercury turns direct on March 7th, but you can expect another hurdle at month's end. The same thing applies with communication. Take the initiative to clear up any recent misunderstandings, although it will take all of your people skills to accomplish that with a difficult co-worker. Expand your knowledge regarding diet and nutrition knowledge on the New Moon. Take a physical fitness class for the fun of it to learn new and easy techniques regarding exercise as well as how to create healthy meals and snacks. If you're already an expert, consider teaching a community class this summer. After the 17th your social life expands and you could meet someone with whom you'll have instant rapport. Whether this person is a new pal or a romantic interest, you can form a strong and lasting bond. Couples in love might want to dash off on a romantic weekend before the 19th. At month's end, gear up for what promises to be a terrific career month, creating a much better cash flow, as April opens.

### LEO (7/23-8/22)

During this mostly easygoing month, you'll experience a few communication and financial challenges. A home or appliance repair could temporarily stretch your budget, and the delays interfere with your work and personal progress. Determination sees you through, as does the ability to shift focus and adapt to challenging situations. Internal tension rises as value-based questions and decisions test your faith in yourself and your universe. Despite your strong sense of loyalty, do whatever is right for

you rather than allowing other people to convince you into lowering your standards, despite your strong sense of loyalty. There is no perfect solution here, other than the one that leaves you feeling good about yourself as well as stress-free. Communication upsets abound all month long, so be sure to listen carefully to what other people say while fully explaining your own thoughts and ideas. With two eclipses occurring this month, patience is equally important. With two eclipses occurring this month. Strive for compromise at month's end with a caring and understanding attitude to help avoid further conflict. Knowledge and information are your keys to career and financial success now.

### **VIRGO (8/23-9/22)**

Although you will encounter some obstacles at work and at home, March will be an easy going month for you, Virgo. Your challenging days continue to involve personal and professional relationships, and it will be up to you to compromise even if you feel it should be the other way around. Talk out any lingering differences after March 18th. New horizons beckon you, and a relaxing trip away after the 17th with your love partner will reduce your stress levels. Better yet, give yourself the royal treatment at a luxury hotel health spa. Even though your love relationship is March's hot pot, heartwarming days will outnumber the challenging ones. Either one of the two eclipses could trigger an exciting new romance if you are searching for a new lover, or prompt the decision to take your current relationship to the next level. This is not the time, however, to introduce someone new to your family members, so put that off until Easter weekend in April. At month's end you could receive a sizeable financial gift from a relative or net a sizeable return on a property deal.

### **LIBRA (9/23-10/22)**

Personal and professional relationships continue to challenge you this month, Libra, although you will be happy with the final outcome. The resolution may even give you a newfound sense of freedom and independence. If it's the right choice, which only you can determine, walk away from a friendship, dating relationship, or a club organization that no longer fulfills your goals or needs. Leave any guilt or regrets behind you and move forward. March's lunar and solar eclipses encourage you to assess your lifestyle as well as how you are keeping fit. If it's not as healthy as it should be get ready to reverse the trend. Start slowly, ease into new exercise routines and habits, and aim for life-long health and well-being. After the 10th you dash out of town for a long weekend of love, while some singles may commit to a lifetime of togetherness. You enter into a positive financial phase after the 18th. This promising influence bodes well for an increase

in family funds in the following month ahead.

### **SCORPIO (10/ 23-11/22)**

Career frustration arises during the course of this month, Scorpio. Keep your cool and try to be flexible because the harder you push, the less progress you will make. All will eventually come together with the help of an ally who might be your least likely supporter. You will want to pick up some family or close friend support beforehand, so they can pick up the slack when necessary. Be careful round the house all month, Scorp! An accident could happen in a flash. Take extra precautions if you are on a ladder, working with tools, or in the kitchen. If you need any repairs, call a professional. There is a terrific influence for your love life as well as filling your calendar with social events. Romance is pure delight the last few days of the month, where some single Scorpios get engaged while others fall in love at first sight.

### **SAGITTARIUS (11/23-12/21)**

Life flows along in March, until month's end, and you will find events and challenges easier to handle and make some real progress. Even so, frustrations and confusions are likely, so think calm and be patient with yourself and others. The energies are also accident-prone, so take care on the road, in the kitchen, and while working with tools. Get your creative energy going on a project or hobby that takes you away from daily stress and strain. Better yet, while keeping up with your exercise routine, begin thinking about a home addition or a garden makeover. The odds are in your favor for meeting someone special this month, Sag. If you're already a couple, home is the best destination after the 18th. It's also a plus for positive family communication. With some luck, you may get the attention of some higher-ups in your career. Knowledge, expertise, and creativity are the key factors here, as well as teamwork. Make networking your priority, especially if you travel on business.

### **CAPRICORN (12/22-1/19)**

Look within for your answers when obstacles and frustrations arise this month. You can really access your inner strength and willpower, as well as your sixth sense. Combine them with your knowledge and experience for problem solving. The result can lead you to practical solutions. Remember that faith in the universe and in you is as important now as anything tangible. Try to take a few days off in early March. A long weekend away from home can ease any tensions, giving you the opportunity to reflect, relax, and renew. Treat yourself and your partner to a few nights at a nearby or upscale hotel and spa. March is an ideal time for entertaining at home as well as romance and socializing with friends. Also favored are other family related activities, such as a reunion or introducing your lover to your family. Finances are stable,

but at month's end expect an unexpected domestic expense or necessary home repair.

### **AQUARIUS (1/20-2/18)**

Insight and inspiration are yours in March, Aquarius. Have faith, because what seemed impossible can become your reality with determination and persistence. Use your imagination, envision the future, and, most of all, talk with a close friend whose opinion you value and trust. Present the facts and your feelings, and then take the good advice to heart. Be careful in taking risks you would otherwise avoid now, Aquarius, especially in the second half of February when an accident could happen in a flash. Let someone else climb the ladder, or lift the heavy boxes. Words are your specialty, so turn on the charm if anyone catches your eye, and take the lead at meetings and presentations. You will also want to spend some time at home with family members after the 16th. You may want to host a reunion, get together or dinner party with family and friends at month's end. Finances show the need to study retirement accounts and investment plans as well as debt reduction if necessary.

### **PISCES (2/19-3/20)**

A question of values rises this month for you, Pisces. Think carefully if you are asked to cut corners to bring a project to completion. With extra effort you can make that happen anyway as long as you align yourself with the right people. Choose them carefully and after much thought. Pamper yourself during your birthday month, Pisces. Make it a celebration of the Spring Equinox to improve your body and improve your life. Get a facial, a massage, a pedicure or whatever will relax you and make you smile. Keep up with your good nutrition, exercise routine, and get yourself some exciting new clothes for spring. This is the month to reach out to others, especially to loved ones. Make them the center of attention and let them know how much they mean to you. You will receive a lot more in return. You will begin to see more money in your paycheck now, Pisces. Recognition in your career is almost a given and a step up is possible. Just be sure you know the extent of any extra responsibilities before you agree to carry the load. This year is full of trickery and deceit. Enlist the help of others, and remember that teamwork can work wonders while making it easy on everyone.
